

MK Net.Work ZipMail True Compression for Notes

In these challenging economic times, the topics of cost reduction, cost-avoidance and Total Cost of Ownership are very timely for Messaging Managers and IT Directors.

Paradoxically, at the same time, there is a major increase of email and collaboration application traffic and, consequently, a permanent need for costly upgrades of network bandwidth and messaging related storage.

The ZipMail email cost-reduction solution for Lotus Notes, from MK Net.Work, provides a very competitive, simple and immediate answer to this dilemma.

The collage features several MK Net.Work ZipMail logos for different products: 'True Compression for Notes', 'Compression Suite for Lotus Notes', 'Compression for QuickPlace', 'Compression for iNotes / Domino Web Access', 'Compression for Notes Databases Server Version', 'Compression for Notes Databases Client Version', and 'Compression for Lotus Notes'. Additionally, there are three line graphs. The top graph is titled 'Needs for Lotus Notes storage extensions for the next 4 years' and compares 'Without ZipMail' (red line) and 'With ZipMail and ZipMail /DB' (green line). The middle graph is titled 'Corporate email traffic for the next 4 years' and compares 'Without ZipMail' (red line) and 'With ZipMail' (green line). The bottom graph is titled 'Needs for email network bandwidth extensions for the next 4 years' and compares 'Without ZipMail' (red line) and 'With ZipMail /DB' (green line). All graphs show a significant reduction in growth over a 4-year period when ZipMail is used.
