With The ZipMail Compression Suite for Lotus Notes, compress all of your Lotus Notes attached files (new and existing) into industry-standard ZIP files, then save your firm huge amounts of network bandwidth, disk space and IT dollars.

ZIP compression and decompression are 100% transparent. No need for any user training!

Next-Generation
ZipMail client version 8.5

A single 200 Kb DLL file to instantly save your Lotus Notes organization many gigabytes of network traffic and disk space.

The ZipMail Compression Suite is dedicated to the reduction of volumes and their resource costs in your Lotus Notes environment.

Offered are Client (Notes and iNotes/DWA) and Server based ZIP compression solutions.

ZipMail will Free up 30 to 50% of your Lotus Notes network bandwidth and disk space enabling you to defer heavy investments in network upgrades, storage and in additional hardware.
Reduction of the Notes traffic and storage makes your whole Notes organization perform smoother and faster.

ZipMail generates a very fast return on investment, generally less than 30 days.

Transparent ZIP compression of Notes attached files
Click the File / Attach menu or hit the Paperclip button, your selected files get instantly compressed into ZIP files before being attached to your Lotus Notes messages or documents.
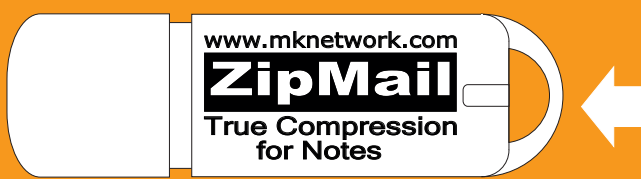

Extensive support of Drag & Drop
Drag & Drop files and folders on your Notes memos and documents, they all get compressed by ZipMail!

Superfast and easy deployment
A single 200 Kb file to deploy!
100% automated setup package for superfast deployment.
Deployment assistance and setup package customization are included in your annual support contract.

All of the multi-year Notes compression experience of MK Net.Work in a single 200 Kb DLL file!
This new version benefits of the multi-year experience of MK Net.Work in providing advanced compression solutions for Notes organizations (more than 2 million users worldwide).

New Security Pack

The new ZipMail 8.5 Security Pack protects your users against the execution of unsafe Notes attached files (compressed or not compressed) like .EXE, .BAT, .VBS, etc.

There are 3 different levels of protection against the execution of unsafe files.

You can also prevent users from attaching particular file types and limit the maximum size of the attachments.

ZipMail 8.5 also supports the new ZIP AES 128, 192 and 256 strong encryption types (for compression and decompression).

Corporate Lotus Notes email traffic for the next 4 years
Without ZipMail
With ZipMail
Year 1   Year 2   Year 3   Year 4

Contrary to any other investment in bandwidth or in disk space, ZipMail volume and cost reduction effects are permanent, in percent of your Notes traffic, for each year.

The more your Lotus Notes email traffic grows, the more your initial investment in ZipMail is profitable!
