

Cut your needs for Lotus Notes storage and network bandwidth by 50% or more.

Our ZipMail / ZipMap volume reduction product line is a unique range of compression and image optimization based transparent solutions dedicated to Notes storage and traffic reduction.

With our volume avoidance oriented solutions (like attached file caching, distributed volume and quota policies), you can go beyond the volume reduction concept, since the volumes to which these solutions apply are simply cancelled!

Cut costs and boost performance of your Lotus Notes organization!

Volume Reduction

Volume + Avoidance
